EDUCATION

University of Batangas September 2026

Bachelor of Science in Computer Engineering

- Represented the University of Batangas at the ICpEP.se Region 4A Regional Convention, General Assembly, and CpE Challenge (Tech Tambayan 2025).
- Awarded 2nd Place during the 2025 InnovEng Essay Writing Competition and was recognized for excellence in breaking down advanced technology frameworks.
- Awarded 1st Place (Champion) during the 2024 Engineering Cup for exceptional technical writing and ability to articulate complex engineering concepts

EXPERIENCE

Sophie's Information Technology Services (SitesPhil) 2025

Computer Engineering Intern (OJT)

- Gained extensive, hands-on experience in computer hardware diagnostics, troubleshooting, and component-level repair alongside system programming and network design.
- Completed 320 hours of comprehensive On-the-Job Training focused on deploying enterprise network solutions and evaluating system integrity under the supervision of the engineering department.
- Designed and executed automated configuration playbooks for infrastructure deployment, drastically reducing manual cycle times for device setup and administration.
- Developed and refined continuous integration workflows using orchestration tools to automate build environments, verify dependencies, and generate deployment quality reports.
- Maintained clean documentation for system setups and network state backups, streamlining infrastructure handoffs and disaster recovery preparations.

TECHNICAL SKILLS

- Programming & Scripting: Python (Object-Oriented Design), C Language, JavaScript Development, SQL Database Management
- Infrastructure & Security: Safety Officer 2 (SO2) Workplace Compliance, Hazard Identification & Risk Assessment, Network Infrastructure Security, Cybersecurity Frameworks, Cryptography, Data Protection, Public Key Infrastructure (PNPKI), Data Privacy Compliance
- Automation & Systems: Linux Environment (Ubuntu), Network Automation, CI/CD Pipeline Automation
- Hardware & Systems Integration: Computer Hardware Diagnostics, Component-Level Repair, Troubleshooting, Network Design

CERTIFICATIONS

Sanfoundry & Platforms 2026

Advanced Software Engineering & Network Security Trainee

- Mastered core programming architectures, including Software Engineering, Artificial Intelligence, JavaScript Development (300 Hours), Python, and C Programming.
- Gained deep practical knowledge in Infrastructure & Data frameworks, focusing heavily on Cryptography, Network Security, Cyber Security, and SQL.

DICT & JGDC Occupational Safety Consultancy 2025 – 2026

Emerging Technology & Compliance Practitioner

- Completed the DOLE-prescribed 40-hour Training Course for Safety Officer 2 (SO2) pursuant to Section 32 of Republic Act No. 11058 and D.O. 198-18.
- Completed intensive safety module workshop series covering Hazard Identification, Risk Assessment, and Control Measure Implementation.
- Completed official Department of Information and Communications Technology (DICT) training modules covering Human Intelligence + Artificial Intelligence (HI+AI), Data Privacy Awareness, and Digital Safety & Public Key Infrastructure (PNPKI).
